

A list of aliens (Written by the humans, the Crossians, the Centaurian Beta Dynasty and the Andromeda ants in 5349)

Humans: Inhabit planet Earth but do not inhabit any other planets. Humans are split up into countries, who once fought each other but are now united towards the same goals. They are allies with the Andromeda Ants, the Centaurian Beta Dynasty and the Crossians. They have 2 arms and 2 legs. They are known for having lots of pollution. Humans and their allies are currently at war with the KATZ, the Centaurian Alpha Dynasty and the Tritons.

Centaurians: Inhabit all the planets that can support life orbiting Alpha and Beta Centauri. However, they are split up between the Alpha Dynasty, who live on planets around Alpha Centauri and the Beta Dynasty, who live on planets around Beta Centauri. The Alpha Dynasty is allies with the KATZ and the Tritons, and the Beta Dynasty is allies with the Andromeda Ants, the humans and the Crossians. The Centaurians look

like humans except larger, stronger and with only one eye. The Alpha Dynasty is at war with the Andromeda Ants, the Centaurian Beta Dynasty, the humans and the Crossians. The Beta Dynasty is at war with the KATZ, the Centaurian Alpha Dynasty and the Tritons.

Crossians: The Crossians live on all the planets orbiting the stars in the southern cross that can support life. They are all united on the same side. They are allies with the Andromeda Ants, the Centaurian Beta Dynasty and the humans. The Crossians look exactly like humans except that they have only got one leg. They are currently fighting the KATZ, the Centaurian Alpha Dynasty and the Tritons.

Andromeda ants: The Andromeda ants are spread in colonies all over the Andromeda Galaxy. Each colony dominates 1 planet. Just like on Earth, they used to fight, but are now united. The Andromeda ants are allied with the Crossians, the Centaurian Beta

Dynasty and the humans. They are at war with the Centaurian Alpha Dynasty, the the KATZ and the Tritons.

Rockodiles: The Rockodiles are crocodiles made of rock. They live on Rockatron, but we currently do not know where Rockatron is. The Rockodiles have sharp teeth to catch fish made of stone. They are not currently allies with anyone and are not at war with anyone either. The rockodiles are all united together. A Rockodillian astronaut is called a cosmodile.

KATZ: The KATZ look like Earth cats but they are much bigger. They live on two planets as far as we know, Meowapolis and Purra Prima. We have no knowledge of their location. We do not know if they are split or not. The KATZ have recently been raiding Earth. They have a special remote control device that can control Earth cats through their whiskers and make them attack their owners. The KATZ are allies

with the Centaurian Alpha Dynasty and the Tritons. They are at war with the Centaurian Beta Dynasty, the humans, the Crossians and the Andromeda Ants.

Tritons: The Tritons look like humans but with three legs, three arms and three eyes. They are all united together as far as we know. They live on Tritaria, but we do not know where Tritaria is. They are allies with the Centaurian Alpha Dynasty and the KATZ. They are currently fighting the Centaurian Beta Dynasty, the humans, the Crossians and the Andromeda Ants.
